

ASSETLINE LEASING COMPANY LIMITED

FINANCIAL STATEMENTS

31 MARCH 2022

SPF/TP/AD

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF ASSETLINE LEASING COMPANY LIMITED**

Report on the audit of the financial statements

We have audited the financial statements of Assetline Leasing Company Limited, which comprise the statement of financial position as at 31 March 2022, and the statement of profit or loss, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

Opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 March 2022 and of its financial performance and its cash flows for the year then ended in accordance with Sri Lanka Accounting Standards.

Basis for opinion

We conducted our audit in accordance with Sri Lanka Auditing Standards (SLAuSs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by CA Sri Lanka (Code of Ethics) and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with Sri Lanka Accounting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SLAuSs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

(Contd...2/)

**Building a better
working world**

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

As required by section 163 (2) of the Companies Act No. 07 of 2007, we have obtained all the information and explanations that were required for the audit and, as far as appears from our examination, proper accounting records have been kept by the Company.

1. CORPORATE INFORMATION

1.1 General

Assetline Leasing Company Limited (The Company) is a public limited liability company incorporated and domiciled in Sri Lanka. The Company was incorporated on 4th March 2003 and obtained the trading certificate on 23rd March 2003. The Company was re-registered under the Companies Act No 07 of 2007. The registered office of the Company is located at No. 120, 120A Pannipitiya Road, Battaramulla. The Company is registered under the Finance Leasing Act No 56 of 2000 and amendments thereto.

1.2 Principal Activities and Nature of Operations

The Company provides a vast range of financial services which includes providing Finance Lease, Mortgage Loans, Margin Trading Facilities, Personnel Loans, Factoring and Trade Finance Loans and Other Financial Services.

There were no significant changes in the nature of the principal activities of the Company during the financial year under review.

1.3 Parent Enterprise and Ultimate Parent Enterprise

The Company's parent undertaking is DPMC Assetline Holdings (Private) Limited. In the opinion of the directors, the Company's ultimate parent undertaking and controlling party is David Pieris Holdings (Private) Limited, which is incorporated in Sri Lanka.

2.1 BASIS OF PREPARATION

2.1.1 Statement of Compliance

The Financial Statements of the Company which comprise Statement of Financial Position, Statement of Profit or Loss, Statement of Comprehensive Income, Statement of Changes in Equity, Statement of Cash Flows together with Accounting Policies and Notes to the Financial Statements have been prepared and presented in accordance with Sri Lanka Accounting Standards (SLFRSs and LKASs) laid down by the Institute of Chartered Accountants of Sri Lanka and in compliance with the requirements of the Companies Act No. 07 of 2007.

2.1.2 Responsibility for Financial Statements

The Board of Directors of the Company is responsible for the preparation and presentation of Financial Statements of the Company as per Sri Lanka Accounting Standards (SLFRSs and LKASs) and the provisions of the Companies Act No 7 of 2007.

2.1.3 Approval of Financial Statements by the Board of Directors

The Financial Statements of the Company for the year ended 31 March 2022 were authorized for issue by the Board of Directors in accordance with a resolution of the Board of Directors on 19 August 2022.

2.1.4 Basis of Measurement

The Financial Statements have been prepared on the historical cost basis, except for the following material items in the Statement of Financial Position.

Item	Basis of measurement	Note No.	Page Ref. No
Financial Assets measured at fair value through Other Comprehensive Income (FVOCI) –	Fair Value	19	43
Investment Property	Fair Value	22	45
Defined Benefit Obligation	Present Value	31	51-52

2.1.5 Functional & Presentation Currency

Items included in the Financial Statements of the Company are measured using the currency of the primary economic environment in which the Company operates. Financial Statements are presented in Sri Lankan Rupees (Rs), which is the Company's functional currency. There was no change in the Company's presentation and functional currency during the year under review.

2.1.6 Presentation of Financial Statements

The assets and liabilities in the Statement of Financial Position of the Company are grouped by nature and listed in an order that reflects their relative liquidity and maturity pattern. No adjustments have been made for inflationary factors affecting the Financial Statements.

An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in note 38 to the Financial Statements.

2.1.7 Materiality and Aggregation

In compliance with LKAS 01 on Presentation of Financial Statements, each material class of similar items is presented separately in the Financial Statements. Items of dissimilar nature or functions too are presented separately, unless they are immaterial.

2.1.8 Offsetting

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liability simultaneously. Income and expenses are not offset in the Statement of Profit or Loss unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies.

2.1.9 Rounding off

The amounts in the financial statements have been rounded off to the nearest Rupee, except where otherwise indicated as permitted by the Sri Lanka Accounting Standard (LKAS 1) – ‘Presentation of Financial Statements’.

2.1.10 Comparative Information

The comparative information is re-classified wherever necessary to confirm to the current year’s presentation.

2.1.11 Events After the Reporting Date

Events after the Reporting Date are those events, favorable and unfavorable, that occur between the reporting date and the date when the Financial Statements are authorised for issue. In this regard, all material and important events that occurred after the reporting period have been considered and appropriate disclosures are made in note 42 to the Financial Statements.

2.1.12 Statement of Cash Flows

The Statement of Cash Flows has been prepared by using the ‘Indirect Method’ of preparing cash flows in accordance with the Sri Lanka Accounting Standard –LKAS 7 on ‘Statement of Cash Flows’ whereby operating activities, investing activities and financing activities are separately recognized. Cash and cash equivalents comprise of short term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Cash and cash equivalents as referred to in the Statement of Cash Flows are comprised of those items as explained in note 15.1 to the Financial Statements.

2.2 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of Financial Statements of the Company in conformity with Sri Lanka Accounting Standards requires the management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

The most significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have most significant effect on the amounts recognised in the Financial Statements of the Company are as follows:

2.2.1 Going Concern

The Directors have made an assessment of the company's ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. In determining the basis of preparing the financial statements for the year ended 31 March 2022, based on available information, the management has assessed the effects of the COVID-19 pandemic and macroeconomic conditions and its effects on the business where the company has an interest and the appropriateness of the use of the going concern basis.

The management has formed reasonable judgement that the Company has adequate resources to continue its business operations for the foreseeable future monitoring its business performance and continuity. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the company's ability to continue as a going concern. Therefore, the Financial Statements continue to be prepared on a going concern basis.

2.2.2 Fair Value of Financial Instruments

The determination of fair values of financial assets and financial liabilities recorded on the Statement of Financial Position for which there is no observable market price are determined using a variety of valuation techniques that include the use of mathematical models. The Company measures fair value using the fair value hierarchy that reflects the significance of input used in making measurements. The fair value hierarchy is given in note 37 to the Financial Statements.

2.2.3 Useful Life-time of the Property, Plant and Equipment

The Company reviews the residual values, useful lives and methods of depreciation of Property, Plant and Equipment at each reporting date. Details are given in note 2.3.18 to the Financial Statements. Judgment of the management is exercised in the estimation of these values, rates, methods and hence they are subject to uncertainty.

2.2.4 Deferred Tax Liabilities/(Assets)

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Details of deferred tax liability and asset are given in note 30 to the Financial Statements.

2.2.5 Defined Benefit Plans

The cost of defined benefit plan is determined using actuarial valuations. An actuarial valuation involves making various assumptions which may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and their long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of Sri Lanka Government bonds with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables. Future salary increases are based on expected future inflation rates and expected future salary increase rate of the Company. The details are discussed in note 31 to the Financial Statements.

2.2.6 Commitment and Contingencies

All discernible risks are accounted for in determining the amount of all known liabilities. Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is not probable or cannot be reliably measured. Contingent liabilities are not recognised in the Statement of Financial Position but are disclosed unless they are remote. Details of commitments and contingencies are given in note 41 to the Financial Statements.

2.2.7 Impairment Losses on Loans & Advances and Lease Rental Receivable & Stock out on Hire

The determination of expected credit loss allowances is highly subjective and judgmental. With the introduction of SLFRS 9 in 2018, a number of additional judgements and assumptions are introduced and reflected in the financial statements, including the identification of significant increases in credit risk and the application of forward looking economic scenarios. The measurement of impairment losses under SLFRS 9 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses. These estimates driven by a number of factors and changes in which can result in different levels of allowances.

Expected Credit Loss (ECL)

The Company measures loss allowances using both lifetime ECL and 12-month ECL. When estimating ECL Company determine whether the credit risk of a financial asset has increased significantly since initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort in order to evaluate ECL. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience, informed credit assessment and including forward-looking information. Details of the ECL are given in note 2.3.1.10.1 to the Financial Statements.

Individual Impairment

The Company reviewed their individually significant loans and advances at each reporting date to assess whether an impairment loss should be recorded in the statement of profit or loss. In particular, management judgement was required in the estimation of the amount and timing of future cash flows when determining the impairment loss. These estimates were based on assumptions about a number of factors and actual results may differ, resulting in future changes to the impairment allowance made. Details of detail of individual impairment are given in note 2.3.1.10.5 to the Financial Statements.

2.2.8 SLFRS 16 – Leases

Under SLFRS 16, a contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company recognises a right of use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made on or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying assets or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right of use asset is subsequently depreciated using straight line method from the commencement date to the earlier of the end of the useful life of the right of use asset or the end of the lease term. The estimated useful lives of right of use assets are determined on the same basis as those of property plant and equipment. In addition, the right of use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The lease liability is subsequently measured at amortised cost using the effective interest method. It is re-measured when there is a change in future lease payments such as Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right of use asset, or is recorded in profit or loss. The Company presents right of use assets under note 25 to the financial statements while the corresponding lease liability is presented under note 27.

2.2.8.1 As a lessor

Lessor's accounting under SLFRS 16 is substantially similar to the accounting treatment for leases under LKAS 17. Lessor can continue to classify the contracts either finances or operating leases according to the LKAS 17 guidelines. Therefore, there is not any impact to the Company's Financial Statements from SLFRS 16 where the company is a lessor.

2.2.8.2 As a lessee

The Company previously classified leases either operating lease or finance lease based on the substance of the transaction. Under SLFRS 16, Company recognised a right of use assets and a lease liability except for the short-term leases and leases for which the underlying asset is low value.

2.2.9 IFRIC 23 -Uncertainty over Income Tax Treatments

This Interpretation clarifies how to apply the recognition and measurement requirements in LKAS 12 when there is uncertainty over income tax treatments. In such a circumstance, an entity shall recognise and measure its current or deferred tax asset or liability applying the requirements in IAS 12 based on taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates determined applying this Interpretation. IFRIC 23 addresses how to reflect uncertainty in accounting for income taxes that are scoped in LKAS 12.

2.2.10. IFRIC 23 Interpretation specially addresses following issues

- Whether an entity considers uncertain tax treatments separately

The Company should determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments based on which approach better predicts the resolution of the uncertainty.

- The assumptions an entity makes about the examination of tax treatments by taxation authorities

The Company should assumed that a taxation authority will examine amounts and it has a right to examine and have full knowledge of all related information when the Company assess whether and how an uncertain tax treatment affects the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates,

- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates

The Company should consider whether it is probable that a taxation authority will accept an uncertain tax treatment.

If the Company concludes it is probable that the taxation authority will accept an uncertain tax treatment, the Company should determine the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment used or planned to be used in its income tax filings.

If the Company concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the Company should reflect the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates.

The Company should measure the impact of the uncertainty using one of the following methods that it concludes would best predict the resolution of the uncertainty.

- i) The most likely amount - The single most likely amount in a range of possible outcomes and may better predict the resolution of the uncertainty if the possible outcomes are binary or are concentrated on one value.
 - ii) The expected value - The sum of the probability-weighted amounts in a range of possible outcomes and may better predict the resolution of the uncertainty if there is a range of possible outcomes that are neither binary nor concentrated on one value.
- How an entity considers changes in facts and circumstances.

The judgements and estimates made to recognise and measure the effect of uncertain tax treatments are reassessed whenever circumstances change or when there is new information that affects those judgements.

The Company has applied IFRIC 23 when the Company determined the taxable profit, tax bases, unused tax losses, unused tax credits and tax rates during the financial year. However, there is no material uncertainty over tax treatment that would require separate disclosures in the Financial Statements by this interpretation

2.3 GENERAL ACCOUNTING POLICIES

2.3.1 Financial Instruments – Initial Recognition, Classification, and Subsequent Measurement

2.3.1.1 Date of Recognition

The Company initially recognises loans & advances and Lease Rentals Receivable & Stock Out on Hire, deposits and subordinated liabilities, etc., on the date on which they are originated. All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the Trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument.

2.3.1.2 Initial Measurement of Financial Instruments

The classification of financial instruments at initial recognition depends on their cash flow characteristics and the business model for managing the instruments.

All financial instruments are measured initially at their fair value plus transaction costs that are directly attributable to acquisition or issue of such financial instruments except in the case of financial assets and financial liabilities at fair value through profit or loss as per SLFRS 9. Transaction cost in relation to financial assets and financial liabilities at fair value through profit or loss are dealt with in the Statement of Profit or Loss.

‘Day 1’ profit or loss

When the transaction price differs from the fair value of other observable current market transactions in the same instrument, or based on a valuation technique whose variables include only data from observable markets, the company immediately recognises the difference between the transaction price and fair value (a ‘Day 1’ profit or loss) in ‘Operating Income

2.3.1.3 Classification and Subsequent Measurement of Financial Assets

The Company classifies all of its financial assets based on the business model for managing the assets and the asset’s contractual terms, measured at either:

- Amortised cost, as explained in note 2.3.1.3.1
- Fair value through other comprehensive income (FVOCI), as explained in note 2.3.1.3.2 and 2.3.1.3.3
- Fair value through profit or loss, (FVTPL), as explained in note 2.3.1.3.4

2.3.1.3.1 Loans and advances, Lease rental receivables and stock out on hire - Financial assets at amortised cost

The Company only measures Loans and advances and lease rental receivables and stock out on hire at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

(a) Business model assessment

The Company makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Company's stated objective for managing the financial assets is achieved and how cash flows are realized.

(b) The SPPI test

Assessments whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

In making the assessment, the Company considers:

- Contingent events that would change the amount and timing of cash flows;
- Leverage features;
- Prepayment and extension terms;
- Terms that limit the Company's claim to cash flows from specified assets; and
- Features that modify consideration of the time value of money.

2.3.1.3.2 Debt instruments at FVOCI

The Company applies the new category under SLFRS 9 of debt instruments measured at FVOCI when both of the following conditions are met

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and foreign exchange gains and losses are recognised in the Income Statement in the same manner as for financial assets measured at amortised cost. Where the Company holds more than one investment in the same security, they are deemed to be disposed of on a first-in first-out basis. On de-recognition, cumulative gains or losses previously recognised in OCI are reclassified from OCI to the Income Statement.

2.3.1.3.3 Equity instruments at FVOCI

Upon initial recognition, the Company occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of definition of Equity under LKAS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in the Income Statement as net trading gain/(loss) when the right of the payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

2.3.1.3.4 Fair value through profit or loss, (FVTPL)

A financial asset shall be measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income. However an entity may make an irrevocable election at initial recognition for particular investments in equity instruments that would otherwise be measured at fair value through profit or loss to present subsequent changes in fair value in other comprehensive income.

2.3.1.4 Classification and Subsequent Measurement of Financial Liabilities

On initial recognition, the Company classifies financial liabilities, other than financial guarantees and loan commitments, into one of the following categories:

- Financial liabilities at amortised cost; and
- Financial liabilities at fair value through profit or loss.

The subsequent measurement of financial liabilities depends on their classification. SLFRS 9 largely retains the existing requirements in LKAS 39 for the classification of financial liabilities.

Debt issued and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR. A compound financial instrument which contains both a liability and an equity component is separated at the issue date.

2.3.1.5 Reclassification of Financial Instruments

Financial Assets

Financial assets are not reclassified subsequent to their initial recognition, except and only in those rare circumstances when the Company's changes its objective of the business model for managing such financial assets. Consequent to the change in the business model, the Company reclassifies all affected assets prospectively from the first day of the next reporting period (the reclassification date). Prior periods are not restated.

Measurement of reclassification of financial assets

(a) Reclassification of Financial Instruments at 'Fair value through profit or loss'

- To Fair value through other comprehensive income

The fair value on reclassification date becomes the new gross carrying amount. The EIR is calculated based on the new gross carrying amount. Subsequent changes in the fair value are recognized in OCI.

- To Amortised Costs

The fair value on reclassification date becomes the new carrying amount. The EIR is calculated based on the new gross carrying amount.

(b) Reclassification of Financial Instruments at 'Fair value through other comprehensive income'

- To Fair value through profit or loss

The accumulated balance in OCI is reclassified to profit and loss on the reclassification date.

- To Amortised Costs

The financial asset is reclassified at fair value. The cumulative balance in OCI is removed and is used to adjust the reclassified fair value. The adjusted amount becomes the amortized cost.

EIR determined at initial recognition and gross carrying amount are not adjusted as a result of reclassification.

(c) Reclassification of Financial Instruments at 'Amortised Costs'

- To Fair value through other comprehensive income

The asset is re-measured to fair value, with any difference recognized in OCI. EIR determined at initial recognition is not adjusted as a result of reclassification.

- To Fair value through profit or loss

The fair value on the reclassification date becomes the new carrying amount. The difference between amortized cost and fair value is recognized in profit and loss.

The company did not reclassify any of its financial assets or liabilities for the financial year under review.

2.3.1.6 De-recognition of Financial Instrument

Financial Assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when

- The rights to receive cash flows from the asset which have expired
- The Company has transferred its rights to receive cash flows from the asset or have assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either;
- The Company has transferred substantially all the risks and rewards of the asset or
- The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On de-recognition of a financial asset, the difference between the carrying amount of the asset and consideration received and any cumulative gain or loss that has been re-recognised in Statement of Profit or Loss.

Financial Liability

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

2.3.1.7 Modification of Financial Instrument

Financial assets

If the terms of a financial asset are modified, the Company evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value.

If the cash flows of the modified asset carried at amortised cost are not substantially different, then the modification does not result in de-recognition of the financial asset. In this case, the Company recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss. If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income.

If the terms of a financial asset were modified because of financial difficulties of the borrower and the asset was not derecognised, then impairment of the asset was measured using the pre- modification interest rate.

Financial liabilities

The Company derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss.

2.3.1.8 Offsetting of Financial Instruments

Offset and the net amount presented in the Statement of Financial Position when and only when the Company has a legal right to set off the recognised amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. Income and expenses are presented on a net basis only when permitted under LKASs / SLFRSs.

2.3.1.9 Determination of Fair Value

The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs. An analysis of fair values of financial instruments and further details as to how they are measured are provided in note 37 to the Financial Statements.

2.3.1.10 Impairment of Financial Assets

2.3.1.10.1 SLFRS 9 – “Financial Instrument” – Key Transition Impact on the Impairment

The Company recognises loss allowance using expected Credit losses (ECL) on loans and receivables and other financial instrument measured at amortised cost model using dual measurement approach which the loss allowance is measured as either 12-month expected credit losses or lifetime expected credit losses.

Under ECL model Company uses a dual measurement approach, under which the loss allowance is measured as either 12-month ECL or lifetime ECL. The measurement basis generally depends on whether there has been a significant increase in credit risk since initial recognition. Special rules apply to assets that are credit-impaired.

The Company applies three-stage approach to measuring expected credit losses (ECL) on Loans and receivables and other financial assets measured at amortised cost. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

Stage 1: 12 months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition, the portion of the lifetime ECL associated with the probability of default events occurring within next 12 months is recognised.

Stage 2: Lifetime ECL – not credit impaired

For credit exposures where there has been a significant increase in credit risk (SICR) since initial recognition but that are not credit impaired, a lifetime ECL is recognised. Significant increase in credit risk and staging criteria standard (SLFRS 9) has given 30-day rebuttable presumption for increase in credit risk. However, the Company considers that the significant increase in credit risk do not occurred equal or later than 60 days (30 days past due)

Stage 3: Lifetime ECL – credit impaired

Financial assets are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. The assessment of whether credit risk on a financial asset has increased significantly will be one of the critical judgments used in impairment model prescribed in SLFRS 9 which uses combination of both qualitative factors and backstop based on delinquency. It is considered that a significant increase in credit risk occurs no later than when an asset is equal or more than 90 days past due. Where there is a significant increase in credit risk Company uses lifetime ECL model to assess loss allowances instead of 12-month ECL model.

The indications of credit impairments are as similar to LKAS 39. The Company considers the indications of credit default do not occur equal or later than 180 days (or 150 days past due) which is in line with the regulatory definition of default.

The key inputs used for measurement of ECL are likely to be the term structures of the following variables:

Probability of Default (PD)	PD is estimates at a certain date, which are calculated, based on statistical models, and assessed using various categories based on homogeneous characteristics of exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. The Company forecast PD by incorporating forward looking economic variables such as Unemployment, GDP growth, Inflation, Risk free rate and using lag effect of these variables.
Loss Given Default (LGD)	LGD is the magnitude of the likely loss if there is a default. The Company estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties.
Exposure at default (EAD)	EAD represents the expected exposure in the event of a default. The Company derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of a financial asset is its gross carrying amount.

The Company has used these parameters from internally-developed statistical models using historical data. All inputs were adjusted to reflect forward-looking information and future economic scenarios.

The ECL impairment is based on the credit losses expected to arise over the lifetime expected credit loss (LTECL), unless there has been no significant increase in credit risk since origination, in which case, the impairment is based on the 12 months' expected credit loss (12mECL).

The 12mECL is the portion of LTECLs that represent the ECLs that result from default event on a financial instrument that are possible within the 12 months after the reporting date. Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments

a) Definition of Default and Cured

The Company considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security or the borrower becomes 150 days past due on its contractual payments.

As a part of a qualitative assessment whether an individual significant customer is in default, the Company also considers a variety of instances that may indicate unlikeliness to pay.

- Significant financial difficulty of the borrower or issuer
- The restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise
- It is probable that the borrower will enter bankruptcy or other financial reorganisation or
- The disappearance of an active market for a security because of financial difficulties.
- The borrower is deceased

The Company's policy to re-classifies financial instruments out of the stage 3 when none of the default criteria have been presented and the borrower is no longer considered as none performing in accordance with the directives of the Central Bank. Once cured, the decision whether to classify an asset as Stage 2 or Stage 1 largely depends on the days past due, at the time of the cure.

b) Significant Increase in Credit Risk

The Company continuously monitors all loan and lease portfolio subject to ECLs. In order to determine whether a portfolio is subject to 12mECL or LTECL, the Company assesses whether there has been significant increase in credit risk since initial recognition. The Company considers an exposure to have a significant increase credit risk when it is past due for equal or more than 30 days.

c) Calculation of Expected Credit Loss (ECL)

ECL is a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECL is discounted at the effective interest rate of the financial asset.

2.3.1.10.2 Grouping Financial Assets Measure in Collective Assessment

The Company calculates ECLs either on a collective or an individual basis. The Company assesses the customers for individual impairment those who have exposure equal to or more than internally established threshold. However if the customer is determined to be not impaired, such customer will be moved back to collective ECL calculation.

For collective assessment, the Company categorises exposures into smaller homogeneous portfolios, based on a combination of internal and external characteristics of the loans and receivable as described below:

- Product type
- Equipment type
- Based on the risk characteristic

2.3.1.10.3 Debt Instrument Measured as FVOCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statements of financial position which remain at fair value. Instead, an amount equal to the impairment that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycle to the profit and loss upon derecognition of the assets.

2.3.1.10.4 Forward looking information

The Company incorporates forward looking information in to this model for calculation of ECL. Using variety of external actual and forecasted Information, the Company formulates a base case view of the future direction of relevant economic variables as well as a representative range (Best Case and worst Case) of other possible forecast scenarios. Following are the forward looking economic inputs

- GDP growth rate
- Unemployment rate
- Risk free rate
- Inflation

2.3.1.10.5 Individually assessed loan and receivables

The Company evaluates all individual significant loan and receivable at each reporting date to determine whether there is any objective evidence that a loan is impaired. The criteria used to determine whether there is objective evidence include:

- Past due contractual payments of either principal or interest
- The probability that the borrower will enter bankruptcy or other financial realisation
- A significant downgrading in credit rating by an external credit rating agency
- known cash flow difficulties experienced by the borrower
- Current economic conditions of the borrower
- Any other legal proceedings against the borrower

Impairment losses are calculated by discounting the expected future cash flows of loans and receivables at its original effective interest rate and comparing the resultant present value with the loans and receivables current carrying amount. Individually assessed impairment allowances are only released when there is reasonable and objective evidence of a reduction in the established loss estimate.

2.3.1.10.6 Write-offs

The Company's carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

2.3.1.10.7 Rescheduled and Restructured Loans

Rescheduled /restructured loans are classified in to the three stages as the date of restored based on the number of days in past due. Number of days in past due are calculated by adding arrears days before and after rescheduled. If the modification is substantial, loan is derecognised.

2.3.1.10.8 Renegotiated Loans

Where possible, the company seeks to restructure accommodations rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, impairment is measured using the original EIR as calculated before the modification of terms and the loan is considered with past due. Management continually reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to a criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment.

2.3.1.10.9 Reversal of Impairment

If the amount of an impairment loss decreases in a subsequent period, and the decrease can be related objectively to an event occurring after the impairment was recognised, the excess is written back by reducing the financial asset impairment allowance account accordingly. The write-back is recognised in the Statement of Profit or Loss.

2.3.2 Cash and Cash Equivalents

Cash and Cash Equivalents are defined as cash in hand, balances with banks and Investments with short maturities i.e. three months or less from the date of acquisition.

For the purpose of cash flow statement, cash and cash equivalents consist of cash in hand and balance with banks and Investments with short maturities i.e. three months or less from the date of acquisition net of outstanding bank overdrafts.

2.3.3 Leases

The company applied Sri Lanka Accounting Standard –SLFRS 16 “Leases”.

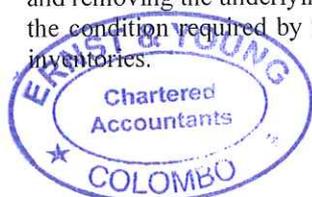

2.3.3.1 Identifying a lease

At inception of a contract, Company can assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To determine whether contract conveys the right to control the use of identified asset, the Company considers the following criteria

- A contract can involve the use of an identified asset when an asset is explicitly identified in a contract or if the asset is implicitly identified at the point at which it is made available for use by the customer. However, even if a contract specifies a particular asset, Company does not have the right to use that asset if the supplier has substantive right to substitute the asset throughout the period of use. That asset is not an identified.
- The Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use and,
 - The Company has the right to direct the use of an identified asset throughout the period of use only if either:
 - (a) the Company has the right to direct how and for what purpose the asset is used throughout the period of use or
 - (b) the relevant decisions about how and for what purpose the asset is used are predetermined and
 - (i) the Company has the right to operate the asset throughout the period of use, without the supplier having the right to change those operating instructions; or
 - (ii) the Company designed the asset in a way that predetermines how and for what purpose the asset will be used throughout the period of use.

2.3.3.2 The Company as the Lessee

The company recognises a right of use asset and lease liability at the commencement date. Initially, right of use asset is recognised at cost, which comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the commencement date, less any lease incentives received, any initial direct costs incurred by the Company and an estimate of costs to be incurred by the Company in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Right of use asset is subsequently measured at cost less any accumulated depreciation and accumulated impairment and adjusted for any measurement of the lease liability

Right of use asset is depreciated using straight line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Company apply LKAS 36 Impairment of Assets to determine whether the right-of-use asset is impaired and to account for any impairment loss identified

Lease liability is initially measured at the present value of the lease payments that are not paid at that date. Lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses the Company's incremental borrowing rate.

At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments the fixed payments, less any lease incentives receivable, variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date, amounts expected to be payable by the Company under residual value guarantees, the exercise price of a purchase option if the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the Company exercising an option to terminate the lease.

The lease liability is subsequently measured as amortised cost by using effective interest rate method.

The company discloses the right of use asset under note no 25.1 to the Financial Statements and corresponding lease liability under note no 25.2 to the Financial Statements.

Short term lease and lease of low value assets

The Company elects not to recognise right of use asset and lease liability for either short-term leases or leases for which the underlying asset is of low value, the Company recognises the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis. The Company apply another systematic basis if that basis is more representative of the pattern of the Company's benefit.

2.3.3.3 The Company as the Lessor

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

The Company recognise lease payments from operating leases as income on either a straight-line basis or another systematic basis. The Company apply another systematic basis if that basis is more representative of the pattern in which benefit from the use of the underlying asset is diminished.

Accounting policies applied by the Company as the Lessor in the comparative figure is not different with SLFRS 16

2.3.4 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation in accordance with the Sri Lanka Accounting Standard – LKAS 37 on 'Provision, Contingent Liabilities and Contingent Assets'.

When the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Statement of Profit or Loss net of any reimbursement. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense.

2.3.5 Dividends on Ordinary Shares

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by the Company's shareholders. Interim dividends are deducted from equity when they are declared and no longer at the discretion of the Company.

2.3.6 Other Non-Financial Assets

Other Non-Financial Assets includes advances paid for suppliers, prepayments, trading stock and tax receivables. Trading stock includes repossessed assets. Other Non-Financial Assets except for trading stock are valued at the lower. Trading stock is measured at the lower of cost or net realisable value.

2.3.7 Investment Properties

Recognition

Investment property is the property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes.

Measurement

Investment properties are initially, recognised at its cost including related transactions cost. Subsequent to the initial recognition, Investment Properties are stated at fair value, which reflect market conditions at the reporting date.

Investment properties of the Company are carried at fair value, any gains or losses arising from changes in fair value are recognised to the Statement of Profit or Loss in the year in which they arise.

The Company measures the fair value of investment property and the Company obtains a valuation at least every three year by an independent valuer who holds recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

De-recognition

Investment property is derecognised upon disposal or when no future economic benefit is expected from its disposal. Any gains or losses arising on de-recognition is included in the Statement of Profit or Loss in the year in which the investment property is derecognised.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

2.3.8 Property, Plant and Equipment

Recognition

Property, Plant and Equipment are tangible items that are held for servicing, or for administrative purposes, and are expected to be used during more than one year. Property, Plant & Equipment are recognised if it is probable that future economic benefits associated with the asset will flow to the Company and the cost of the asset can be measured reliably in accordance with LKAS 16 on Property, Plant & Equipment.

Measurement

An item of Property, Plant and equipment that qualifies for recognition as an asset is initially measured at its cost. Cost includes expenditure that is directly attributable to the acquisition of the asset and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Management.

The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalised as part of computer equipment.

a) Cost Model

Property, Plant and Equipment of the Company is stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value. Such cost includes the cost of replacing part of the equipment when that cost is incurred, if the recognition criteria are met.

b) Revaluation Model

Under revaluation model, properties are carried at a revalued amount, being their fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. On revaluation of an asset, any increase in the carrying amount is recognised in 'Other comprehensive income' and accumulated in equity, under revaluation reserve or used to reverse a previous revaluation decrease relating to the same asset, which was charged to profit and loss .

If the value is increased, it is recognized as income to the extent of previously written down. Any decrease in the carrying amount is recognized as expenses to the Statement of Profit and Loss or debited to other comprehensive income to the extent of any credit balance existing in the revaluation reserve in respect of such asset.

The decrease recognised in other comprehensive income reduces the amount accumulated in equity under revaluation reserves. Any balance remaining in the revaluation reserve in respect of an asset is transferred directly to retained earnings on retirement or disposal of the asset. The company has not used the revaluation model to recognise the property plant and equipment.

Subsequent Cost

Subsequent expenditure is capitalised only when it is probable that the future economic benefits of the expenditure will flow to the Company. On-going repairs and maintenance cost are expensed as incurred

De-recognition

The carrying amount of an item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use. The gain or losses arising from de-recognition of an item of property, plant and equipment is included in other operating income in the Statement of Profit or Loss when the item is derecognised. When replacement costs are recognised in the carrying amount of an item of property, plant and equipment, the remaining carrying amount of the replaced part is derecognised. Major inspection costs are capitalised.

At each such capitalisation, the remaining carrying amount of the previous cost of inspections is derecognised

Borrowing Cost

As per the Sri Lanka Accounting Standard – LKAS 23 on Borrowing Cost, The Company capitalises borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of the asset. A qualifying asset is an asset which takes a substantial period of time to get ready for its intended use or sale. Other borrowing costs are recognised in the profit or loss in the period in which they occur. The Company does not capitalise any borrowing cost which is relating to the qualifying assets during the financial year under review.

2.3.9 Intangible Assets

An intangible asset is an identifiable non-monetary asset without physical substance held for use in the production or supply of goods or services, for rental to others or for administrative purposes. The Company's intangible assets include the value of computer software.

Recognition

An intangible asset is recognised if it is probable that the future economic benefits that are attributable to the asset will flow to the entity and the cost of the assets can be measured reliably. An intangible asset is initially measured at cost. Expenditure incurred on an intangible item that was initially recognised as an expense by the Company in previous Annual Financial Statements or Interim Financial Statements are not recognised as part of the cost of an intangible asset at a later date.

Computer Software

Cost of purchased licenses and all computer software costs incurred, licensed for use by the Company, which are not integrally related to associated hardware, which can be clearly identified, reliably measured and it's probable that they will lead to future economic benefits, are included in the Statement of Financial Position under the category of 'Intangible Assets' and carried at cost less accumulated amortisation and any accumulated impairment losses.

Subsequent Expenditure

Expenditure incurred on computer software is capitalised only when it is probable that this expenditure will enable the asset to generate future economic benefits in excess of its originally assessed standard of performance and this expenditure can be measured and attributed to the asset reliably. All other expenditure is expensed as incurred.

De-recognition

Intangible assets are derecognised on disposal or when no future economic benefits are expected from its use. The gain or loss arising from de-recognition of an item of intangible asset is included in the Statement of Profit or Loss when the item is derecognised.

2.3.10 Other Financial Liabilities

Other financial liabilities are recognised initially at fair value and subsequently measured at amortised cost. Other financial liabilities include trade payables, advances collected from customers and other financial payable. Trade payables are obligations to pay for vehicle suppliers in the ordinary course of business.

2.3.11 Other Non-Financial liabilities

The Company classifies all non-financial liabilities other than post-employment benefit liability, deferred tax and current tax liabilities under other non-financial liabilities. Other non-financial liabilities include guarantee fee, statutory payments, provision and other non-financial payable. These liabilities are non-interest bearing and recorded at the amounts that are expected to be paid.

2.3.12 Recognition of Income and Expenses

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised.

2.3.13 Interest Income and Interest expense

Under SLFRS 9, interest income or expense is recorded using the effective interest rate method (EIR) for all financial instruments measured at amortised cost, interest bearing financial assets designated at fair value through profit or loss and interest income on interest bearing financial assets designated at fair value through other comprehensive income under SLFRS 9.

EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability.

The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the EIR, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the company revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original EIR and the change in carrying amount is recorded as 'Interest and similar income' for financial assets and 'Interest and similar expense' for financial liabilities. However, for a reclassified financial asset for which the company subsequently increases its estimates of future cash receipts as a result of increased recoverability of those cash receipts, the effect of that increase is recognised as an adjustment to the EIR from the date of the change in estimate.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the assets. The calculation of the interest income does not revert to the gross basis, even if the credit risk of the asset improves.

2.3.14 Fee and Service Charge income

Fee and Service charge income includes transfer fee and service charges arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the documents and inspection of vehicle are recognised on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria. Fee and Service charge income are given in note 7 to the Financial Statements.

2.3.15 Other Operating Income

Income earned from other sources, which are not directly related to the normal operations of the Company is recognised as other operating income. Other operating income includes gains/loss on disposal of property, plant and equipment, hiring income, rent income and dividend income. Other operating income is given in note 8 to the Financial Statements.

Dividend income

Dividend income is recognised when the right to receive the payment is established

Gain or Losses on Disposal of Property, Plant and Equipment

Gains or losses resulting from the disposal of property, plant and equipment are recognised in the Statement of Profit or Loss, in the period in which the sale occurs.

Operating Lease Income

Income arising on operating leases is accounted for on a straight-line basis over the lease terms on on-going leases and is recorded in the Statement of Profit or Loss in other operating income.

2.3.16 Impairment (Charges)/Reversal for Loans, Lease and Other Losses

The Company recognises the changes to the impairment provision for loans and other losses which are assessed as per the SLFRS 9. The methodology adopted by the Company is explained in the note 2.3.1.10 to the Financial Statements.

2.3.17 Personnel Expense

Personnel expenses include salaries and bonus, terminal benefits and other staff-related expenses. The provision for bonus is recognised when it is probable that an outflow of resource embodying economic benefits will be required to settle the obligation and a reliable estimate can be made on the amount of the obligation.

Short Term Employee Benefits

Short term employee benefits are measured on an undiscounted basis and expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short term benefits as a result of past service provided and where the Company has legal or constructive obligation to pay.

Defined Contribution Plans

Employees are eligible for Employees' Provident Fund Contributions and Employees' Trust Fund Contributions in line with the respective statutes and regulations. The Company contributes 12 % and 3% of gross emoluments of employees to Employees' Provident Fund and Employees' Trust Fund respectively.

Defined Benefit Plan

Defined Benefit plan is post-employment benefit plan other than the Defined Contribution plan. The Company measures the present value of the promised retirement benefits for gratuity, which is a defined benefit plan with the advice of an independent professional actuary using the Projected Unit Credit Method (PUC) as required by LKAS 19, Employee Benefits.

Retirement benefit obligation is recognised in the Statement of Profit or Loss based on an actuarial valuation carried out for the gratuity liability in accordance with Sri Lanka Accounting Standard- LKAS 19 - Employee Benefits.

2.3.18 Other Operating Expenses

Other operating expenses are recognised in the Statement of Profit or Loss on the basis of a direct association between the cost incurred and the earning of specific items of income. All expenditure incurred in the running of the business and in maintaining the property, plant and equipment in a state of efficiency has been charged to the Statement of Profit or Loss in arriving at the profit for the year. Other operating expenses are given in note 9 to the financial Statements.

Depreciation of Property, Plant & Equipment

The Company provides depreciation from the date the assets are available for use up to the date of disposal, at the following rates on a straight-line basis over the periods appropriate to the estimated useful lives, based on the pattern in which the asset's future economic benefits are expected to be consumed by the Company of the different types of assets.

Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or the date that the asset is derecognised. Depreciation does not cease when the assets become idle or is retired from active use unless the asset is fully depreciated.

Estimated useful lives are as follows

Class of Asset	Useful life	% per annum
Motor Vehicles	4 Years	25
Furniture & Fittings	5 Years	20
Office Equipment	5 Years	20
Leasehold Improvements	3 Years	33.33

Amortization of Intangible Assets

Intangible assets are amortised on a straight-line basis in the Statement of Profit or Loss from the date when the asset is available for use, over the best estimate of its useful economic life based on a pattern in which the assets economic benefits are consumed by the Company.

Intangible assets represent the cost of computer software and the useful life time is as follows.

Asset Category	Useful life	% per annum
Computer software	4 years	25

Amortization of Right of Use Assets

Asset Category	Useful life	% per annum
Right of Use Assets	4 years	25

Changes in Estimates

Depreciation/ Amortization methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

Deferred Expenses

The costs of acquiring new businesses including commission, marketing and promotional expenses, which vary with and directly related to production of new businesses, are deferred to the extent that these costs are recoverable out of future rentals.

2.3.19 Taxation

2.3.19.1 Income taxation

As per Sri Lanka Accounting Standard - LKAS 12 (Income Taxes), tax expense is the aggregate amount included in determination of profit or loss for the period in respect of current and deferred taxation. Income tax expense is recognised in the Income Statement except to the extent it relates to items recognised directly in 'Equity' or 'Other Comprehensive Income (OCI)', in which case it is recognised in Equity or in OCI.

a) Current tax

Current tax assets and liabilities consist of amounts expected to be recovered from or paid to the Commissioner General of Inland Revenue in respect of the current year and any adjustment to tax payable in respect of prior years. The tax rates and tax laws used to compute the amount are those that are enacted or substantially enacted by the reporting date. Accordingly, provision for taxation is based on the profit for the year adjusted for taxation purposes in accordance with the provisions of the Inland Revenue Act No 24 of 2017 and the amendments thereto at the rates specified in note 13 to the Financial Statements.

b) Deferred Tax Liability

Deferred income tax liabilities are recognised for all taxable temporary differences except where the deferred income tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

c) Deferred Tax Assets

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax assets and unused tax losses can be utilised except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred income tax relating to items recognised directly in equity is recognised in the equity and not in the Statement of Profit or Loss.

2.3.19.2 Value added tax (VAT) on finance service

VAT on financial services is calculated in accordance with Value Added Tax Act No. 14 of 2002 and subsequent amendments thereto. The base for the computation of value added tax on financial services is the accounting profit before VAT and income tax adjusted for the economic depreciation and emoluments of employees including cash benefits, none cash benefits and provision relating to termination benefits computed on prescribed rate.

3. Sri Lanka Accounting Standards issued but not yet effective as at March 31, 2022

The new and amended standards and interpretations that are issued up to the date of issuance of the Company's financial statements but are not effective for the current annual reporting period, are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

3.1 SLFRS 17 Insurance Contracts

In 8 January 2020, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued SLFRS 17 Insurance Contracts (SLFRS 17). SLFRS 17 was amended by Amendments to SLFRS 17 - Insurance Contracts, in 28 June 2021. SLFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, SLFRS 17 will replace SLFRS 4 Insurance Contracts (SLFRS 4) that was issued in 2005. SLFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of SLFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in SLFRS 4, which are largely based on grandfathering previous local accounting policies, SLFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of SLFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

SLFRS 17 is effective for annual reporting periods beginning on or after 1 January 2023, with comparative figures required. Early application is permitted, provided the entity also applies SLFRS 9 and SLFRS 15 on or before the date it first applies SLFRS 17.

3.2 Amendments to LKAS 37 Provisions, Contingent Liabilities and Contingent Assets : Onerous Contracts – Costs of Fulfilling a Contract

In 25 March 2021, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued amendments to LKAS 37 Provisions, Contingent Liabilities and Contingent Assets (LKAS 37) to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

The amendments apply a “directly related cost approach”. The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract

The amendments are effective for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted.

3.3 Amendments to LKAS 16 Property, Plant & Equipment : Proceeds before Intended Use

In 25 March 2021, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued LKAS 16 Property, Plant and Equipment — Proceeds before Intended Use, which prohibits entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognizes the proceeds from selling such items, and the costs of producing those items, in profit or loss statement.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

3.4 Amendments to SLFRS 3 Business Combinations : Updating a reference to conceptual framework

In 23 March 2021, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued amendments to SLFRS 3 Business Combinations - Updating a Reference to the Conceptual Framework. The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements.

An exception was also added to the recognition principle of SLFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of LKAS 37 or IFRIC 21 Levies, if incurred separately.

At the same time, it was decided to clarify existing guidance in SLFRS 3 for contingent assets that would not be affected by replacing the reference to the Framework for the Preparation and Presentation of Financial Statements.

The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and apply prospectively.

3.5 SLFRS 9 Financial Instruments – Fees in the '10 per cent' test for derecognition of financial liabilities

As part of its 2018-2020 annual improvements to SLFRS standards process, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued an amendment to SLFRS 9 Financial Instruments (SLFRS 9). The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted.

3.6 Amendments to SLFRS 9, LKAS 39, SLFRS 7, SLFRS 4 and SLFRS 16 - Interest Rate Benchmark Reform Phase 1 and 2

IBOR reform Phase 1

In 15 January 2021, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued amendments to SLFRS 9, LKAS 39 and SLFRS 7 due to Interest Rate Benchmark Reform (Phase 1). A summary of Phase 1 amendments are as follows:

Highly Probable Requirement: when determining whether a forecast transaction is highly probable to be designated as a hedged item, an entity shall assume that the interest rate benchmark on which the hedged cashflows are based is not altered as a result of the reform

Prospective assessments: when performing prospective assessments to evaluate whether a hedging relationship qualifies for hedge accounting, an entity shall assume that the interest rate benchmark on which the hedged item, hedged risk and/or hedging instrument are based is not altered as a result of the interest rate benchmark reform

LKAS 39 retrospective assesment: an entity is not required to undertake the 'LKAS 39 retrospective assesment' for hedging relationships directly affected by the reform. However, the entity must comply with all other LKAS 39 hedge accounting requirements, including the prospective assessment

Separately identifiable risk components: For hedges of non-contractually specified benchmark component of interest rate risk, an entity shall apply the requirement of risk component (or a portion) to be separately identifiable to be eligible for hedge accounting, only at the inception of such hedging relationships.

IBOR reform Phase 2

In addition to Phase 1 amendments, CA Sri Lanka also issued amendments to SLFRS 9, LKAS 39, SLFRS 7, SLFRS 4 and SLFRS 16 due to Interest Rate Benchmark Reform. The Phase 2 amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). The amendments include several practical expedients.

The effective date of both IBOR reform Phase 1 and Phase 2 amendments is for annual reporting periods beginning on or after 1 January 2021 in the Sri Lankan context.

3.7 Amendments to SLFRS 16 Leases: Covid-19-Related Rent Concessions beyond 30 June 2021

In 4 December 2020, the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) issued Covid-19-Related Rent Concessions - amendment to SLFRS 16 Leases. The amendments provide relief to lessees from applying SLFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under SLFRS 16, if the change were not a lease modification.

The amendment was intended to apply until 30 June 2021, but as the impact of the Covid-19 pandemic is continuing, in 28 June 2021, CA Sri Lanka extended the period of application of the practical expedient to 30 June 2022. The amendment applies to annual reporting periods beginning on or after 1 April 2021.

None of the new or amended pronouncements are expected to have a material impact on the Financial Statements in the foreseeable future.

The company has transferred its land in Nugegoda (17P in extent) to DPMC Assetline Holdings (Private) Limited, (the parent company) on 31st July 2021, at a consideration of Rs.69.5 million, in compliance with the Finance Leasing (Corporate Governance) Direction No.04 of 2009.

The Company's policy is to obtain an independent valuation for its Investment Property at least once in three years. Accordingly the Company had obtained a valuation as at 31 March 2021 from Mr. U.S. Silva Chartered Valuation Surveyor. Based on the management judgement, the values of the properties as at 31 March 2022 were not changed significantly from the last year's valuation. Therefore, the previous valuations were continued for the current year.

Location	Buildings Sq. Ft	Land in Extent	Fair Value	
			2022	2021
Pelawatta - Parliament Road	11040	08P	107,000,000	107,000,000

			<u>231,900,000</u>	<u>301,400,000</u>

22.2 Net profit from investment properties	2022 Rs.	2021 Rs.
Rental income derived from investment properties	8,500,867	9,479,240
Direct operating expenses (including repair and maintenance) generate rental income	(735,326)	(1,004,225)
Direct operating expenses (including repair and maintenance) that did not generate rental income	(695,040)	(583,552)
Net profit arising from investment properties carried at fair value	<u>7,070,501</u>	<u>7,891,463</u>

22.3 Fair value related disclosures of the Investment Properties

Fair Value hierarchy

The fair value of the Company's investment property are categorised into Level 3 of the fair value hierarchy.

Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques used in measuring the fair value of investment property, as well as the significant unobservable inputs used.

Type of Property	Valuation technique	Significant unobservable inputs	Range 2022	Range 2021
Land & Building	Cost Method/Direct Comparison Method	Estimated Price per sq.ft (Building)	Rs. 4,500- Rs. 7,350	Rs. 4,500- 7,350
		Estimated Price per perch (Land)	Rs. 5.7 Mn- Rs. 9.0Mn	Rs. 5.7 Mn- Rs. 9.0Mn
Land	Direct Comparison Method	Estimated Price per perch	Rs. 4.25 Mn	Rs. 4.25 Mn

Significant increase/(decrease) in this input in isolation would result in a significant (lower)/higher fair value.

		<u>105,799,616</u>	<u>90,520,374</u>

	2022	2021
31.6 Assumptions		
Discount Rate	15.00%	8.00%
Salary Increment	13.00%	7.00%
Retirement Age*	60 Years	55 Years
Expected Average Future Working Years	7.3 Years	7.1 Years

31.7 Sensitivity of Assumptions Employed in Actuarial Valuation

The following table demonstrates the sensitivity to a reasonably possible change in the key assumptions employed with all other variables held constant in the retirement benefit liability measurement.

The sensitivity of the statement of Comprehensive income and statement of Financial Position is the effect of the assumed changes in discount rate and salary scale in the profit or loss and retirement benefit obligation for the year.

Increase/(Decrease) in discount rate	2022		
	Increase/(Decrease) in salary increment	Sensitivity Effect on statement of Comprehensive Income - Increase/(Reduction) in results for the year (Rs. Mn)	Sensitivity Effect on Retirement Benefit Obligation - Increase/(Reduction) in liability (Rs. Mn)
1%		0.87	5.67
-1%		-0.97	-6.31
	1%	-1.04	-6.85
	-1%	0.95	6.24

Increase/(Decrease) in discount rate	2021		
	Increase/(Decrease) in salary increment	Sensitivity Effect on statement of Comprehensive Income - Increase/(Reduction) in results for the year (Rs. Mn)	Sensitivity Effect on Retirement Benefit Obligation - Increase/(Reduction) in liability (Rs. Mn)
1%		0.78	4.99
-1%		-0.87	-5.58
	1%	-0.93	-6.01
	-1%	0.85	5.47

32. STATED CAPITAL

Issued and Fully Paid-Ordinary Shares	2022		2021	
	No of Shares	Rs.	No of Shares	Rs.
Stated Capital	133,958,971	3,550,000,000	133,958,971	3,550,000,000
	<u>133,958,971</u>	<u>3,550,000,000</u>	<u>133,958,971</u>	<u>3,550,000,000</u>

The Authorised Capital and Par Value Concept in relation to shares were abolished by the Companies Act No. 07 of 2007. The total amount received by the Company or due and payable to the Company in respect of the issue and calls of the shares are referred to as stated capital.

Stated Capital

The holders of ordinary shares are entitled to receive a dividend as declared from time to time and are entitled to one vote per share at meetings of the Company.

33. STATUTORY RESERVE FUND

The Reserve Fund is maintained in compliance with the Central Bank Direction No. 5 of 2006 issued to specialised leasing companies. As per the said Direction, every registered Finance Leasing Establishment shall maintain a reserve fund, out of the net profit after the payment of tax of each year, before any dividend is declared. A sum equivalent to not less than 5 percent of such profits should be transferred until the amount of the Reserve Fund is equal to 50 percent of the issued and paid up ordinary share capital of the relevant establishment and further a sum equivalent to not less than 2 percent of such profits until the amount of Reserve Fund is equal to the issued and paid-up ordinary share capital of the relevant establishment.

	2022	2021
	Rs.	Rs.
At the beginning of the year	960,305,226	902,552,488
Profit transferred during the year	106,521,495	57,752,738
At the end of the year	<u>1,066,826,721</u>	<u>960,305,226</u>

34. FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME RESERVE

Fair value through other comprehensive income reserve, which comprises changes in fair value of Financial Assets - Fair Value through Other Comprehensive Income

	2022	2021
	Rs.	Rs.
Balance as at 1 April	3,426,140	3,790,410
Changes in fair value during the year	(3,509,890)	(364,270)
Balance as at 31 March	<u>(83,750)</u>	<u>3,426,140</u>

35. RETAINED EARNINGS

This represents the undistributed earnings held by the Company to be used in the Company's operations. This could be used to absorb future possible losses or dividend payments.

36. RELATED PARTY TRANSACTIONS

The Company carries out transactions in the ordinary course of business with the parties who are defined as related parties in the Sri Lanka Accounting Standards - LKAS 24 (Related Party Disclosures), the details which are reported below,

36.1 Terms and Condition

The Company carries out transactions with Parent Company, Appellate Company, KMPs & their close family members in the ordinary course of its business on an arms length basis at commercial rates.

36.2 Transactions with Key Management Personnel (KMP)

According to Sri Lanka Accounting Standards - LKAS 24 (Related Party Disclosures) key managerial personnel (KMP) are those having authority and responsibility for planning, directing and controlling the activities of the entity. According to the above definition, a person cannot be considered as a KMP unless such person has both the authority and responsibility to carry out all of the three activities mentioned in the above definition (i.e planning, directing and controlling the activities of the entity).

KMP of the Company

Key Management Person are Directors of the Company, Compliance Officer of the Company and the Chief Executive Officer of the Company.

36.2.1 Key Management Personnel Compensation

	Courier Charges	416,748	351,073
	Reimbursed Expenses	1,759,557	179,760

37. FAIR VALUE OF FINANCIAL INSTRUMENTS

37.1 Determination of Fair Value and Fair Value Hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by Valuation techniques.

- Level 1 : Quoted (unadjusted) prices in active markets for identical assets or liabilities in active market
 Level 2 : Valuation technique using observable inputs : quoted prices for similar assets and liabilities in active markets are valued using models where all significant inputs are observable.
 Level 3: Valuation technique with significant unobservable inputs : assets valued using valuation techniques where one or more significant inputs are unobservable.

The following table shows an analysis of assets recorded/disclosed at fair value by level of the fair value hierarchy.

As at 31st March

Assets	2022			2021		
	Level 1 Rs.	Level 2 Rs.	Level 3 Rs.	Level 1 Rs.	Level 2 Rs.	Level 3 Rs.
Financial Assets FVOCI	25,673,925	-	-	121,010,284	-	-
Investment Property *	-	-	231,900,000	-	-	301,400,000
Total Assets	25,673,925	-	231,900,000	121,010,284	-	301,400,000

Level 3- Investment property Valuation

Based on the management judgement, the values of the properties as at 31 March 2022 were not changed significantly from the last year's valuation. Therefore, the previous valuations were continued for the current year. The previous year's valuation was obtained from Mr. U.S. Silva Chartered Valuation Surveyor.

Date of valuation	31.03.2021
Valuation technique	Cost Method and Direct Comparison Method
Significant unobservable inputs	- Estimated Price per sq.ft - Estimated Price per perch

37.2 Fair Value of Financial Assets & Liabilities Not Carried at Fair Value

The following describes the methodologies and assumptions used to determine fair values of those financial instruments which are not already recorded at fair value in the Financial Statements.

Assets for which Fair Value Approximates Carrying Value

Financial Assets and Liabilities that have a short term maturity, it is assumed that the carrying amounts approximate their fair values.

Fixed Rate Financial Instruments

The fair Value of fixed rate financial assets and liabilities carried at amortised cost are estimated by comparing market interest rates when they were first recognized with current market rates for similar financial instruments

Variable Rate Financial Instruments

Variable rate is a fair measure which reflects market movements. Hence the carrying value represents the fair value of the variable rate instruments.

Set out below is the comparison, by class, of the carrying amounts of fair values of the company's financial instruments that are not carried at fair value in the financial statements. This table does not include the fair values of non- financial assets and non- financial liabilities.

39. RISK MANAGEMENT

39.1 Introduction

Risk is inherent in a financial business and such risks are managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Company's continuing profitability and each individual within the Company is accountable for the risk exposures relating to his or her responsibilities.

The Company is exposed to credit risk, interest rate risk, liquidity risk, operational risk, the latter being subdivided into regulatory & compliance risk, reputation risk and environmental risk. The independent risk control process does not include business risks such as changes in the environment, technology and industry.

The Company's policy is to monitor those business risks through the Company's strategic planning process.

39.1.1 Risk Management Structure

The board is primarily responsible for risk management initiatives. Integrated Risk Management committee (IRM), which is a sub-committee of the board has been established and delegated risk management responsibilities. This Committee plays a vital role in establishing best practices in relation to risk policies and practices within the company.

The quantum and level of risks that the company is willing to accept is decided at the Board Risk Committee level, and the decisions made by this committee is communicated to the Board of Directors. The Board ratifies the risk policies and risk tolerance levels agreed at the Integrated Risk Management Committee meetings.

The committee fulfils the requirement set out in the Finance Leasing Direction No. 4 of 2009 on Corporate Governance for Finance Leasing Establishments issued by Central Bank of Sri Lanka (CBSL) under Finance Leasing Act, No. 56 of 2000.

This Committee consists of such number of members, as the board may determine from time to time. The committee currently consists of membership of 1 Directors, Chief Executive Officer and key management personnel supervising broad risk categories, i.e. credit, market, liquidity, operational and strategic risks.

In addition to the IRM Committee, Risk Management function is managed by Risk Management Unit (RMU). RMU is responsible for implementing and maintaining risk related procedures to ensure an independent control process is maintained. The unit works closely with the Risk Committee to ensure that procedures are compliant with the overall framework. RMU is also responsible for monitoring compliance with risk principles, policies and limits across the Company. This unit also ensures the complete capture of the risks in risk measurement and reporting systems. Exceptions are reported on once in a two month, where necessary, to the Risk Committee, and the relevant actions are taken to address exceptions and any areas of weakness.

The Company's policy is to ensure that risk management processes throughout the Company are audited annually by the Internal Audit function, which examines both the adequacy of the procedures and the Company's compliance with the procedures. Internal Audit division discusses the results of all assessments with management, and reports its findings and recommendations to the Board Audit Committee.

39.1.2 Risk measurement & Reporting System and Risk Mitigation

The positioning map of each risk component is placed within the risk grid. Tolerance levels are set by using sustainable measurements and these are discussed at risk management meetings. The risk console indicates the severity of each component of risk.

39. RISK MANAGEMENT (Contd...)

39.2 Credit Risk

Credit risk refers to the risk that borrowers will default on any type of debt by failing to make payments they are obligated to do. The risk of loss of principal or loss of a financial reward stems from a borrower's failure to repay a loan or otherwise meet a contractual obligation. The risk is primarily that of the lender and includes lost principal and interest, disruption to cash flows, and increased collection costs. The loss may be complete or partial and can arise in a number of circumstances.

Credit risk is closely tied to the potential return, the most notable being that the yields on portfolios correlate strongly to their perceived credit risk. The strategy of Company is not to eliminate risk, but to maintain the same within pre-determined acceptance levels. The Company manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

39.2.1 Impairment Assessment

The Company recognises loss allowance using expected Credit losses (ECL) on loans and receivables and other financial instrument measured at amortised cost model using dual measurement approach which the loss allowance is measured as either 12-month expected credit losses or lifetime expected credit losses.

The ECL impairment is based on the credit losses expected to arise over the lifetime expected credit loss (LTECL), unless there has been no significant increase in credit risk since origination, in which case, the impairment is based on the 12 months' expected credit loss (12mECL).

The 12mECL is the portion of LTECLs that represent the ECLs that result from default event on a financial instrument that are possible within the 12 months after the reporting date. Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

Definition of Default and Cured

The Company considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security or the borrower becomes 150 days past due on its contractual payments.

As a part of a qualitative assessment whether an individual significant customer is in default, the Company also considers a variety of instances that may indicate unlikelihood to pay.

- Significant financial difficulty of the borrower or issuer
- The restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise
- It is probable that the borrower will enter bankruptcy or other financial reorganisation or
- The disappearance of an active market for a security because of financial difficulties.
- The borrower is deceased

The Company's policy to re-classifies financial instruments out of the stage 3 when non of the default criteria have been presented and the borrower is no longer considered as none performing in accordance with the directives of the Central Bank. Once cured, the decision whether to classify an asset as Stage 2 or Stage 1 largely depends on the days past due, at the time of the cure.

Significant Increase in Credit Risk

The Company continuously monitors all loan and lease portfolio subject to ECLs. In order to determine whether a portfolio is subject to 12mECL or LTECL, the Company assesses whether there has been significant increase in credit risk since initial recognition. The Company considers an exposure to have a significant increase credit risk when it is past due for equal or more than 30 days.

39. RISK MANAGEMENT (Contd...)

39.2 Credit Risk

Calculation of ECL

ECL is a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECL is discounted at the effective interest rate of the financial asset.

Individually assessed allowances

The Company reviews their individually significant loans and advances at each statement-of-financial-position date to assess whether an impairment loss should be recorded in the statement of profit or loss. In particular, management's judgment is required in the estimation of the amount and timing of future cash flows when determining the impairment loss. These estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the impairment allowance.

Loans and advances that have been assessed individually and found to be not impaired and all individually insignificant loans and advances are then assessed collectively, in groups of assets with similar risk characteristics, to determine whether provision should be made due to incurred loss events for which there is objective evidence, but the effects of which are not yet evident. The collective assessment takes in to account data from the loan portfolio (such as levels of arrears, credit utilization, loan-to-collateral ratios, etc.), and judgments on the effect of concentrations of risks and economic data (including levels of unemployment, inflation and interest rates.)

The criteria used to determine whether there is objective evidence include:

- Past due contractual payments of either principal or interest
- The probability that the borrower will enter bankruptcy or other financial realisation
- A significant downgrading in credit rating by an external credit rating agency
- known cash flow difficulties experienced by the borrower
- Current economic conditions of the borrower
- Any other legal proceedings against the borrower

Impairment losses are calculated by discounting the expected future cash flows of loans and receivables at its original effective interest rate and comparing the resultant present value with the loans and receivables current carrying amount. Individually assessed impairment allowances are only released when there is reasonable and objective evidence of a reduction in the established loss estimate.

Collectively assessed allowances

The collective assessment takes account of data from the loan portfolio (such as historical losses on the portfolio, levels of arrears, credit utilization, loan to collateral ratios and expected receipts and recoveries once impaired) and futuristic economic data (such as economic conditions, unemployment levels and local or industry-specific problems).

The Company applies three-stage approach to measuring expected credit losses (ECL) on Loans and receivables and other financial assets measured at amortised cost. Assets migrate through the three stages based on the change in credit quality since initial recognition.

39.2.1.1 Assessment of provision for impairment

39.2.1.1 (a) Analysis of the total provision for impairment is as follows.

As at 31 March 2022	Note	Stage 1	Stage 2	Stage 3	Total
Deposits with Licensed Commercial Banks	16.1	56,317	-	-	56,317

Balance as at 31st March	2,558,024,184	2,028,344,840

39.2.1.2 Sensitivity Analysis : Impact of staging of loans on collective allowance for expected credit losses

The Company has estimated the impairment provision on loans and advances to other customers as at March 31, 2022, subject to various assumptions. The changes to such assumptions may lead to changes in inputs used for the computation of the impairment provision.

The following table demonstrates the sensitivity of the impairment provision of the Company as at March 31, 2022 to a reasonably possible change in PDs, LGDs and forward looking information.

Sensitivity on ECL	Sensitivity effect on Statement of Financial Position [Increase/(Decrease) in impairment provision]				Sensitivity effect on Income Statement
	Stage 1	Stage 2	Stage 3	Total	
PD 1% increase across all age buckets	31,984,062	14,423,731	-	46,407,793	(46,407,793)
PD 1% decrease across all age buckets *	(31,605,981)	(14,353,525)	(188,962)	(46,148,468)	46,148,468
LGD 5% increase	32,801,874	103,719,761	106,304,071	242,825,705	(242,825,705)
LGD 5% decrease *	(32,801,874)	(103,719,761)	(106,304,071)	(242,825,705)	242,825,705

* The PD/LGD decrease is capped to 0%, if applicable.

39.2.2 Analysis of Maximum Exposure to Credit Risk

The following table shows the maximum exposure to credit risk by class of financial assets and fair value of collateral held by the Company.

	2022		2021	
	Maximum Exposure to credit Risk Rs.	Net Exposure Rs.	Maximum Exposure to credit Risk Rs.	Net Exposure Rs.

39.3 Interest Rate Risk

Interest rate risk refers to the variability in value borne by an interest-bearing asset, such as a loan or a bond, due to variability of interest rates. In general, as rates rise, the price of a fixed rated bond or Loan Portfolio will fall, and vice versa. Asset liability management is a common name for the complete set of techniques used to manage interest rate risk within a general enterprise risk management framework.

The fluctuation of interest rates is an external factor which is beyond the control of the company. Assetline leasing though is affected by movements in interest rates to the extent that its asset / liability mismatches gives rise to interest paying liabilities being re-priced faster than its interest earning assets. This in turn affects Net Interest income and Net Interest Yields.

Interest rate risk analysis is almost always based on simulating movements in one or more yield curve. The strategy of the company is not to eliminate risk, but to maintain the same within pre-determined acceptance levels.

In setting the Tolerance levels for Interest rate risk, the following metrics are used.

- Minimum Net Interest Spread: In order to maintain the required Net Interest Spread at the budgeting level the required ROA, ROE are inputs. Further the NPL ratios for different categories of assets are used as a proxy for setting the risk premium.
- Setting the proportion of Variable Rated Borrowing's within the Overall Borrowing Mix. This would be set by using the extent to which Budgeted Net Interest Income (NII) is affected by the extensive use of Variable Rated Borrowings.
- Setting the Lending to Borrowing ratio in order to maintain gearing at the desired levels

39. RISK MANAGEMENT (contd...)

39.3.1 Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the company's Income Statement & Equity.

Currency of Borrowings/ Advance	Increase (Decrease) in basis points	%	Sensitivity of profit and loss(Before Tax)		Sensitivity of equity	
			Rs. Mn	Rs. Mn	Rs. Mn	Rs. Mn
Long Term Loans linked to AWPLR - 2022	+1/(-1)		(8)/ 8		(8)/ 8	
Long Term Loans linked to AWPLR - 2021	+1/(-1)		(12)/ 12		(12)/ 12	

The base ratio considers in the Interest Rate Sensitivity Analysis is the AWPLR. Since 75.78% of total borrowings are linked to AWPLR, the above sensitivity ratio indicates the impact on Statement of Profit or loss and to Equity.

39.3.2 Interest rate Risk

Interest rate risk exposure on non trading Financial Assets and Liabilities

The table below analyses the company's interest rate risk exposure on financial assets & liabilities. The company's assets & liabilities are included at carrying amount and categorized by the earlier of contractual re- pricing or maturity dates.

39. RISK MANAGEMENT (contd...)

39.4 Liquidity Risk

Liquidity risk refers to the availability of sufficient cash balances to meet new lending targets as well as provide a flow of net liquid assets to meet contractual borrowings and other commitments. Liquidity risk is financial risk due to uncertain liquidity. An institution might lose liquidity if its credit rating falls, it experiences sudden unexpected cash outflows, or some other event causes counterparties to avoid trading with or lending to the institution. A firm is also exposed to liquidity risk if markets on which it depends are subject to loss of liquidity.

The Company maintains a portfolio of highly marketable and diverse assets that are assumed to be easily liquidated in the event of an unforeseen interruption of cash flow. The Company also has committed lines of credit that it can access to meet liquidity needs. In addition, the Company maintains the liquidity ratio prescribed by Central Bank of Sri Lanka.

39.4.1 Statutory Liquid Asset Ratio

As per the requirements of Finance Leasing (Liquid Assets) Direction No. 04 of 2012, Company has to maintain minimum liquid assets, not less than 10% of Total Liabilities and Off Balance Sheet items excluding liabilities to Shareholders, securitizations & Asset backed Long Term Borrowings.

As at 31st March 2022, the Company maintained Statutory Liquid Asset ratio at 11.06%. (As at 31st March 2021 - 10.04%)

39.4.2 Contractual maturities of Undiscounted Cash flows of Financial Assets & Liabilities

The table below analyses the company's internal interest rate risk exposure on non- trading financial assets & liabilities. The company's assets & liabilities are included at carrying amount and categorized by the earlier of contractual repricing or maturity dates.

39.5 Operational Risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to operate effectively, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The company cannot expect to eliminate all operational risks, but it endeavors to manage these risks through a control framework and by monitoring and responding to potential risks. Controls include effective segregation of duties, access, authorization and reconciliation procedures, staff education and assessment processes, such as the use of internal audit.

Assetline Leasing Company Limited
NOTES TO THE FINANCIAL STATEMENTS

Year ended 31 March 2022

40. CAPITAL

The Company maintains an activity managed capital basis to cover risks inherent in the business and meet the capital adequacy requirements of Central Bank of Sri Lanka. The adequacy of the company's capital is monitored based on the measures, rule and ratios adopted by Central Bank of Sri Lanka. The Company needs to maintain minimum tier 1 core capital ratio of 6.5% and total capital adequacy ratio of 10.5% as at March 31, 2022. The Company has always maintained capital adequacy ratio above the minimum regulatory requirement. The Company has recorded 22.26% (32.47%-2021) of tier 1 and 23.24% (33.42%-2021) of total capital adequacy ratio as at March 31, 2022.

Capital Management

The primary objective of Company's capital management policy are to ensure that the company complies with externally imposed capital requirements and healthy capital ratios in order to support its business and to maximize shareholder's value.

41. COMMITMENT AND CONTINGENT LIABILITIES

41.1 There were no material contingent liabilities outstanding as at the reporting date.

41.2 Commitment

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is not probable or cannot be reliably measured. Contingent liabilities are not recognised in the Statement of Financial Position but are disclosed unless they are remote.

Un - Utilised Facilities

	2022 Rs.	2021 Rs.
Margin trading	114,770,557	66,560,536
Trade Finance	-	12,265,615
Total Commitment	114,770,557	78,826,151

42. EVENTS OCCURRED AFTER THE REPORTING DATE

Events after the reporting period are those events, favourable and unfavourable, that occur between the reporting date and the date when the Financial Statements are authorised for issue.

Surcharge Tax

The Government of Sri Lanka in its Budget for 2022 proposed a one-time surcharge tax, at a rate of 25% to be imposed on companies that have earned a taxable income in excess of Rs. 2 Bn. for the year of assessment 2020/21. The tax was imposed by No. 14 of 2022 Surcharge Tax Act which was passed by the Parliament of Sri Lanka on 7 April 2022. As the law imposing the surcharge tax was enacted after the end of the reporting period, the Financial Statements ended 31 March 2022 do not reflect in the tax liability.

The tax liability is amounting to Rs. 943,231,796/- and the Company has paid the same in two installments on the respective due dates.

Finance Business License

Company is in the process of obtaining the Finance Business License in accordance with the Finance Business Act No: 42 of 2011. In compliance with the principle approval received from the Monetary Board of CBSL, as a part of the processes, the company has made a payment of Rs: 400 Mn towards this license on June 23, 2022.

43. COMPARATIVE INFORMATION

No any comparative information have been reclassified during the financial year.
